

# Que News

Your Monthly Information Source for Everything AdQue.

Hello!

We would like to thank everyone for the great feedback on our web-based calendars, albums, and rateboards! This month we have a very exciting new feature in development—our web-based Flash Editor. We also have our usual link to your monthly generic images, and a survey about what you would like to see more of graphically. We are also introducing *Express* tips to help you manage content with more ease.

## Generics, and Templates, and Backgrounds ... Oh My!

We want to know what graphics  
you want to see more of!

Whether it's more InfoQue backgrounds, more moving backgrounds, templates of all kinds, full motion video, or holidays—we want to know what you think. We are ready to create—and our web-based flash editor will provide many new options—but first we need to know what you want.

Please take our short—very short—survey so we can provide the graphics you need. Your responses are invaluable and we thank you for your time in advance!

## Express Tips & Tricks

Did you know you can assign your own **keywords** to images you upload? Keywords make finding your images easy and also give you a quick way to identify images with similar thumbnails. To add keywords: in the **Media Browser**, click the *magnifying glass* below the image, choose the *Advanced* tab, type in your keywords and press save.

## May's Generic Images...

Large block colors, bright photos, plenty of space for your logo, and subtle line tracers will make this series sure to catch anyone's eye. As always, all three resolutions and templates to match are included. Check them out for yourself...

## Just Released... Web-based Flash editor!

No you are not dreaming—you can now create images without ever leaving the AdQue website. For those of you who need to be able to create images from anywhere or find SWISH/Flash to be confusing, we have developed our web-based flash editor. You can create images and see what they will look like immediately. Download the images for use anywhere (your website, etc.). You start with one of our generic templates from the Media Browser click the wrench icon and start creating. For more information about how to use the web-based flash editor [click here](#) for the help document from the Downloads section on our website.
